

Via Transportation

On-Demand Transportation

Via is the technology backbone of a modern transportation network. We transform public transportation systems into dynamic networks, based on data and demand. Cities and transit agencies around the world adopt Via's suite of software and technology-enabled services to replace fragmented legacy systems and consolidate operations. As a result, Via lowers the cost of providing transit, improves the passenger experience, and brings more riders on board. The Via platform is utilized by hundreds of cities across more than 30 countries to create public transportation systems that connect people with jobs, healthcare, and education.

OMNIA Partners

Public Sector Government Purchasing Alliance.

The contract between Via and OMNIA Partners enables Cities, Counties, Transit agencies and school districts to utilize Via's suite of services and forgo the cost associated with the competitive bid process. Going out to bid for a transportation solution can be a lengthy and complicated process, often leading to compromises on price rather than quality. In some cases, the pressure of a competitive bidding process might even result in abandoning the project altogether. For transportation agencies looking to implement innovative, efficient solutions, this can mean missed opportunities for growth and improvement.
