

## Urban Trail Examples:

**Amarillo, TX**  
**Palo Pinto, TX**  
**La Jolla, CA**  
**Madison, WI**  
**Fayetteville, AR**  
**Cuyuna, MN**

Rock Solid is in the business of transforming communities. Unused green space can be transformed into urban recreation areas with a bit of creative planning.

Palo Pinto, TX

Rock Solid is currently constructing a 6 ft wide multi-use path in Texas' newest State Park, offering an outdoor recreation experience for the nearby DFW area.

This beginner friendly trail was constructed near San Diego, CA in the spring of 2023. Creating a consistent tread throughout thick brush is nothing new for our crews.

La Jolla, CA

Madison, WI

The "Shred To School" trail in Madison, WI offers distinctly unique experiences by combining a traditional greenway and a winding, bike optimized chip seal option.

# Urban Trail Examples:

Optional Rock "Features" allows riders to challenge their skills, and promotes rider progression without fear of failure.

Example: Centennial Park  
Purpose built XC and CX venue catering to both amateur and UCI professional events, including signature features such as Stonehenge and Monster Mountain

Centennial was also designed to connect to Kessler Mountain and other parks featuring singletrack, chip seal recreational trails, and sports fields.

Rock Solid regularly constructs trails to the "Adaptive MTB" Standard, to allow users on hand cycles to experience the trail safely and efficiently.

Example: Cuyuna Lakes, MN.  
Rock Solid Constructed 70+ miles of an interconnected city trail system that annually attracts thousands of outdoor enthusiasts.
