## Plan Review Checklist

The Plan Review Checklist is completed by FEMA. States and local governments are encouraged, but not required, to use the PRT as a checklist to ensure all requirements have been met prior to submitting the plan for review and approval. The purpose of the checklist is to identify the location of relevant or applicable content in the plan by element/sub-element and to determine if each requirement has been “met” or “not met.” FEMA completes the “required revisions” summary at the bottom of each element to clearly explain the revisions that are required for plan approval. Required revisions must be explained for each plan sub-element that is “not met.” Sub-elements in each summary should be referenced using the appropriate numbers (A1, B3, etc.), where applicable. Requirements for each element and sub-element are described in detail in Section 4: Local Plan Requirements of this guide.

Plan updates must include information from the current planning process.

If some elements of the plan do not require an update, due to minimal or no changes between updates, the plan must document the reasons for that.

Multi-jurisdictional elements must cover information unique to all participating jurisdictions.

<b>Required Revision:</b>		
<p><b>C4-b:</b> The plan must describe the criteria used for prioritizing the implementation of the actions. The criteria must include an emphasis on the extent to which benefits are maximized, in relation to the associated costs of the action. Although a full benefit-cost analysis is not necessary, the plan must demonstrate that proposed mitigation actions will be prioritized by weighing the cost of the action versus the benefits the action will produce, in addition to other prioritization factors.</p> <p>For Dam Failure the plan stated that there was a data deficiency for location, extent, impact, vulnerability, and that there was an action item addressing this deficiency. Although the plan includes an action to conduct an annual risk assessment, there was no action found addressing the dam failure data deficiency.</p> <p><b>Addressing C4.b:</b> Language was added to Page 148 (PDF), Section 17: Mitigation Actions, to describe the criteria used for prioritizing the implementation of the actions. Additionally, a Mitigation Action was added to Page 151 (PDF), Section 17: Mitigation Action, of the Plan to address the Dam Failure data deficiency.</p> <p><b>C5-b:</b> The plan must identify applicable potential funding sources. For those actions that specify “alternative funding” or “grant funding,” the plan must specify what sources could fund those actions. The plan states, “The potential funding sources listed for each identified action may be used when the Planning Team member begins to seek funds to implement actions,” but the actions do not identify the potential funding sources.</p> <p><b>Addressing C5.b:</b> The mitigation action's potential funding sources were revised to specify the sources that could possibly fund the actions to aid planning team members seeking funding for the actions. The revisions can be found on Pages 151-165 (PDF), Section 17: Mitigation Actions, in the mitigation actions table's potential funding source column.</p>
